AAOM
PROLOTHHERAPY WORKSHOP
ANNOUNCEMENT

Guadalajara, Mexico
November 1-8, 2014

ALMOST SOLD OUT!
Very few spots remaining!

The AAOM Prolotherapy Education Core Philosophy -
Prolotherapy is a very powerful tool that we are placing in your care to use when the diagnosis warrants; use it safely, properly and you and your patients will benefit greatly!
The AAOM with the Antiguo Hospital Civil de Guadalajara Fray Antonio Alcalde announce the Prolotherapy Treatment Workshop November 1 – 8, 2014. The Antiguo Hospital Civil de Guadalajara Fray Antonio Alcalde will host our patient treatment activities and education programs which include daily lectures, instruction in patient evaluation and diagnosis, solutions, needle placement, injection technique and patient treatment to over 1000 patients. This year in Guadalajara we will be working in a brand new facility- opened in the outpatient Rehabilitation Medicine Clinic area of The Antiguo Hospital Civil de Guadalajara Fray Antonio Alcalde which has just recently been completed. We will take only 20 students, and each table of 2 students will have their own room. Patients will be scheduled such that each student will have the opportunity to inject patients with all types of pain including back pain, patients with shoulder pain, patients with elbow problems, patients with hip and pelvis pain, etc., so that when you see these problems in your clinic you should be comfortable with starting at least a basic treatment regimen. There will be plenty of patients to see but it will not be overwhelming and there will be someone there to help you at each step if you need it and experts to ask questions of regarding more advanced techniques if you are at that stage.

What you can expect from an AAOM Educational Program:
The AAOM Mission for Education........
In all of the AAOM Educational endeavors, the AAOM strives to provide students with:

- The best and most experienced instructors
- A student to instructor ratio of 4 to 1 for individualized attention
- The best instruction about prolotherapy both as a treatment methodology; with emphasis on anatomy, needle skills and as a specific treatment using 15 - 25% dextrose
- An understanding of the treatment methodology of prolotherapy, which will facilitate having greater success with other injection therapies including PRP and Stem Cell injections
- When to use and how to use prolotherapy as a standalone treatment, or as a combined or layered treatment with subcutaneous perineural injections, interventional spine techniques, PRP, and manual medicine
- An understanding of the mechanisms of healing with prolotherapy and when it may be a good or even the only option for treatment
- Fundamental instruction about prolotherapy grounded in the basics of anatomy and diagnosis of MSK pain
- Accurate MSK diagnostic skills, which is actually the cornerstone of our training in prolotherapy; we provide the techniques and understanding that only through proper diagnosis can it be determined why a patient is in pain and if and when prolotherapy may be a good treatment option.

JOIN US in learning one of the most rewarding procedures in all of Medicine - Prolotherapy. This technique allows you to be the healer you set out to be when you went to medical school.

What Workshop Attendees Have to Say About Their AAOM Prolotherapy Workshop Experience

“Magnificent gratitude’ are the words I would use to describe my experience in Mexico. Treating a population in need, and them in exchange being open to allow physicians to perform and perfect their needling technique with supervision. Loads of patients, great supervision with guidance and instruction. Amazing people, doctors and confidence builder. Spiritually uplifting, beautiful warm patients and location. Life altering. Thank you AAOM for this opportunity! Keep up the great healing!”

Mary Harrow, DO

The Cancun AAOM Workshop has been invaluable in my training as a prolotherapist treating sports medicine as well as chronic musculoskeletal injuries. The workshop is well organized with practical lectures and hands on diagnostic and injection techniques lead by many of the top physicians in the world. The repetitions and one- on- one instruction alone is worth the trip, not to mention the community of physicians who embrace and foster your learning experience. It is “a must” for those wanting to learn or perfect their anatomical and injection techniques for what I believe is rapidly becoming the orthopedics of the future!”

J. Mike Carlson, DO

“The AOM Prolotherapy Workshop In Guadalajara, Mexico, Is Well Worth It. Last Year Doctors From Israel, Hong Kong, New Zealand, The United States And Mexico Join Together To Have A Marvelous 1 Week Experience With A Highly Regarded Team Of Professors And Assistants. It Is A Completely New Experience Of How To Treat The Patients With Prolotherapy And Will Help You Immensely In Your Confidence Of How Patients Should Be Treated In Each Individual Practice. The Workshop Is One Of A Kind And Highly Recommended. Enjoy The Experience.”

Mauricio Arouesty, M.D

“I was pleased to be part of the AAOM Prolotherapy trip to Mexico. It was such a great experience to have direct training and supervision by some of the leaders in Prolotherapy and pain management. I was very impressed with the teaching faculty. Every instructor had many years of experience and they were all very approachable and informative. This trip gave me the opportunity to meet other physicians with the same passion for helping those with chronic musculoskeletal pain syndromes. In my opinion, the AAOM is the best Prolotherapy and Regenerative Orthopaedic Medicine in today’s medical community.”

Matthew Bauer, DO

“I signed on, with my wife Genny by my side, to spend a week doing prolotherapy in Mexico under the auspices of AAOM.. To say that doing the mission is life changing would be selling it short. These missions, combining the camaraderie of excellent doctors, the transfer of skills from one doctor to another, and seeing the relief of suffering patients whom we treat is a feeling that is indescribably good. It’s what we all went into medicine to do. - To help people indiscriminately - with no concern about ability to pay or, insurance. Both Genny and I thoroughly enjoyed our week of work and late nights. Genny, who is fluent in Spanish, served as my translator, helping me and the other doctors with patients. She soon became popular and I had to fight for her services since she was being called in all directions. She loved every minute of it as did I, and, we are now planning another mission. I made a lot of new friends in that week and I’m sure, in the years to come, will become even better friends with these new friends. I thoroughly enjoy these types of programs and AAOM does it well. AAOM is an organization I am proud to be a member of and an active participant. I would recommend the Mexico mission to any physician who doesn’t mind hard work, combined with a great learning experience and patient care. You will go back to your practice with a renewed sense of self-worth and pride. You can’t put a price on that.”
